Assessment Criteria	Excellent (4)	Good (3)	Basic (2)	Developing (1)
Collaboration and Teamwork	Actively participates, listens, contributes ideas, and consistently helps the group. Cooperates effectively in international eTwinning tasks.	Collaborates positively and participates in most group activities.	Participates irregularly and needs support to collaborate.	Rarely participates or makes teamwork difficult.
Creativity and Innovation	Designs original and creative solutions contributing innovative ideas about recycling.	Presents interesting and creative ideas in the proposed tasks.	Ideas are simple or lack originality.	Shows little creativity or copies models without adapting them.
Digital Competence	Uses Scratch, Micro:bit, and digital tools independently, safely, and effectively.	Correctly uses digital tools with little support.	Needs frequent help using digital tools.	Has significant difficulties using digital tools.
Linguistic Competence	Communicates clearly using appropriate vocabulary and actively participates in written and oral exchanges.	Expresses ideas clearly and appropriately.	Communicates with some difficulties or in a limited way.	Has major difficulties expressing and understanding ideas.
Problem Solving	Identifies problems and proposes effective, independent solutions during the project.	Solves most problems with some independence.	Frequently needs help solving difficulties.	Has difficulties facing problems or gives up easily.
Critical Thinking	Analyses the importance of recycling and critically reflects on environmental impact and proposed solutions.	Reflects appropriately on the topics studied.	Provides simple or underdeveloped reflections.	Shows little or no critical reflection.
Programming and Computational Thinking	Creates functional and well-structured programs in Scratch and Micro:bit using logic and sequences correctly.	Develops correct programs with minor errors.	Creates simple programs with support.	Has major difficulties with programming.
Environmental Awareness	Shows strong commitment to recycling and applies sustainable habits inside and outside the classroom.	Understands and applies basic sustainable habits.	Shows limited interest in environmental care.	Shows little or no interest in environmental topics.
Final Project Presentation	The presentation is clear, organised, attractive, and demonstrates strong understanding of the work completed.	The presentation is correct and well structured.	The presentation is basic or poorly organised.	The presentation is incomplete or difficult to understand.
